Response to RFI #78 – Teen TV Pull wire 06/10/2024

Since the Teen’s gaming TV has an Ethernet outlet height of 6’ 2” AFF (per RFI #75), the outlet needs to be mounted next to or near the Ethernet jack behind the TV. The conduit will house the pull wire for the 3 HDMI cables and optionally one fiber optic cable.

As stated, the other end will be a box 18” AFF directly under the TV using a 2” flexible conduit and pull wire. This end will be covered with a table or lockable cabinet for the video games and consoles.

Both ends need some sort of suitable outlet cover. See pictures.
