RFI Number: 83
RFI Title: ACG Badge Workstation

References:

Description of Request for Information in Detail:

Will the library require a client workstation to issue credentials (badges) for the library site only. This will also allow for the library to perform lockowns, schedule opening and closing, etc. ACG will need to verify that they have allowed workstation available on the enterprise software license agreement. The additional library workstation can perform as a standalone for the library only and still be controlled by the SBPG server workstation.
