Response to SPECIAL SYSTEMS SUBMITTALS

08/06/2024

The library staff has found many problems and irregularities with the submittals. They are organized below in the following order:

1. Sound System
2. Intrusion System
3. Paging System
4. Telecom
5. Video Surveillance
6. Access Control

Also included in this document are suggested submittals for the items that are missing or need to be replaced/upgraded.

Missing from the special system submittals in section 16600 of the project manual was part 3.1 (Lightning protection system) and part 3.2 (Fire protection system).

1 – SOUND SYSTEM SUBMITTALS

- 1) The Atlas 340-21B sound rack is too small to fit the specified devices .(The rack specified holds 12U, items specified use 15U). **This needs to be replaced with Atlas 340-28B** which holds 16U.

- 2) There is a power outlet and an ethernet jack in the ceiling for a projector. The plans need to indicate a flexible conduit tube between this projector and the metal sound rack. Inside this conduit will be two (2) HDMI video cables and a stereo RCA audio cable. Estimated cable length is 50 feet. See attached diagram showing placement.

- 3) The Listen Technologies **LT-100-216** amplifier was mentioned to be removed in the Library's October 2020 document. It is no longer available and it was a receiver on the WRONG frequency. **Please delete this item.**

- 4) The Listen Technologies **LA-122** antenna needs to be **ADDED** to the list. As mentioned in the October 2020 Library document, the sound rack is a metal cage that blocks FM radio frequencies transmitted, so an external antenna outside the box is needed.

- 5) Architect drawing ASK016 and project manual section 11130-1 specifies a motorized projection screen in the main meeting room for the video projector, which was not in the submittal. **Please add the motorized screen.** Preferred screen size is 88" x 140".

- 6) The submittals neglected to add a video projector for the meeting room. I am suggesting an LG BU50RG Probeam 4K which should be bright enough at 5,000 lumens and will support 2 HDMI and wireless connections via WiFi, Bluetooth and Miracast. Retail price is about \$3,800.

- 7) The architect plans call for two (2) Ethernet jacks in the back of the main meeting room mounted 1 foot below ceiling level for PTZ cameras. The library plans to use these cameras to record and/or live stream the story time performances and library board meetings pursuant to Act 393, La R.S. 42:14(E) for remote access. **Please add two PTZOptics Move SE 30X cameras and their mounts.**

Accounting of Sound Rack Cabinet (per Project Manual section 16600)

1U	Tascam BD-MP1 DVD/Blu-ray player
1U	DBX 220I Equalizer/feedback eliminator
2U	Crown XTI-1002 amplifier
3U	Behringer RX 1202 FX mixer
1U	Furman M-9x2 power conditioner
3U	Heavy metal storage drawer
2U	Rack shelf
2U	Rack shelf
15U	TOTAL RACK SPACE NEEDED (Min.)

SECTIONAL WALL CABINETS WITH 12", 15", AND 18" DEEP CENTER SECTION

**300B Series
320B Series
340B Series**

320-21B

340-42B

FEATURES

- Sturdy Wall-Mount Cabinet Protects Equipment and Saves Valuable Floor Space
- Selection Includes Models with 12", 15", and 18" D Center Mounting Sections
- Reinforced Frame Flanges, Plus Corner-Brace Structural Supports and Electric-Welded Seams & Miters Provide Stability for Mounted Equipment
- Punched Vents Assure Heat Dissipation
- Wire Management Provisions Allow Organized Wire Access
- Adjustable Mounting Rails Provide Flexibility
- Choice of Standard Solid, Optional Plexiglass, or Optional Vented Door Styles Meet Application Needs

APPLICATIONS

The 300B, 320B and 340B Series cabinets have been engineered to provide full functional and mechanical flexibility for wall-mounting standard 19" wide rack equipment. Sectional assemblies may be installed to accommodate right or left-hand hinging applications, and are ideal for use in areas with limited floor space or "protected" access requirements. Units are commonly used to house electronic switching, monitoring, sound and communication controls in school auditoriums, health care facilities, presentation/conference centers, manufacturing facilities, laboratories, public buildings, and recreational complexes. They can also be used to house computer control equipment, studio electronics, and building management/security systems in commercial, industrial, institutional, and military applications.

GENERAL DESCRIPTION

Series 300B, 320B and 340B Series wall cabinets are distinguished by center-section depths of 12", 15", and 18", respectively. Basic model includes three, 16-gauge CRS sections which include a 2" deep, solid-steel front door, a 12", 15", or 18" D center section with adjustable mounting rails, and a 4 1/2" D rear door. Panel space openings range from 12 1/2" to 61 1/2". Enclosures are equipped with convenient and useful provisions for custom cabinet mounting, wire management, equipment mounting, and structural support. (See page 2 for detailed information.) Cabinet is finished in #962 black epoxy.

* Listed panel opening allows 3/4" clearance at top and bottom (3/4" total).
† Suffix model with P (plexiglass) or V (vented steel).

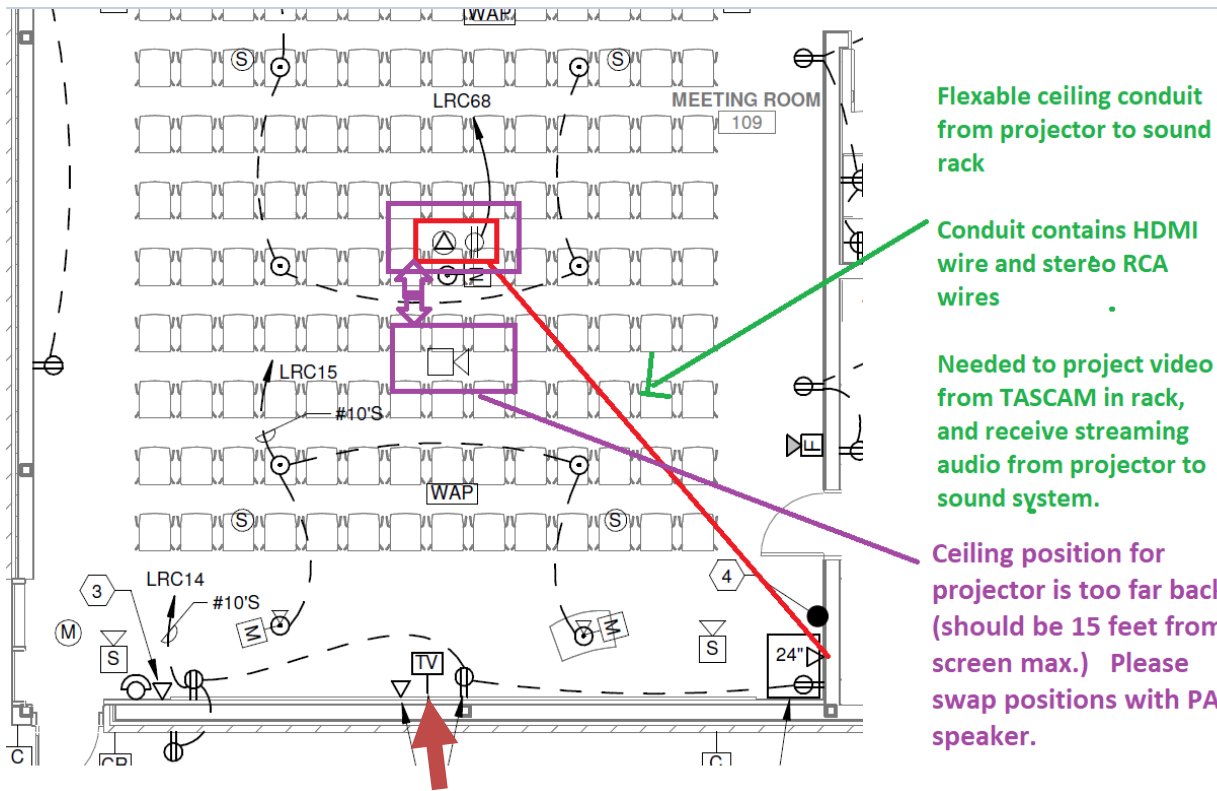

** Non-LDB Models include a 2" deep steel front door

*** Mounts LDB Series only.

Specifications subject to change without notice

1601 JACK MCKAY BLVD. / ENNIS, TEXAS 75119 U.S.A. / TELEPHONE: (800) 876-3333 / FAX (800) 765-3435

Mount the Ethernet, TV and power outlets at the same standard floor height (18"), due to having a projector screen instead of a flat-screen TV at this location.

**LA-122
Universal Antenna Kit (72 and 216 MHz)**

Configuration:

LA-122 Universal Antenna Kit (72 and 216 MHz)

Product Overview:

Complete with antennas for both 72 MHz and 216 MHz systems, the LA-122 Universal Antenna Kit gives you a single solution for your venue's remote antenna needs. Included mounting hardware allows the antennas to be attached to walls, mounted on electrical boxes, installed on a horizontal surface, or even inside a wall or ceiling. The LA-122 includes all the necessary components to configure several different versions of the antenna, and a 25-foot coaxial cable is also provided.

Highlights:

- Includes antennas for both 72 MHz and 216 MHz systems
- Range up to 305 m / 1,000 ft @72 MHz, 914 m / 3,000 ft @216 MHz.
- Mounting hardware allows for multiple installation options including walls, electrical boxes, and more
- Complete kit for configuring different versions of the antenna
- Comes with 25 feet of coaxial cable (RG-58)

Includes:

- Two (2) LA-102 Telescoping Top Mounted Antenna (216 MHz)
- Two (2) LA-106 Telescoping Top Mounted Antenna (72 MHz)
- Two (2) Flexible Antenna (72 MHz)
- Two (2) Flexible Antenna (216 MHz)
- One (1) Grounding Base
- One (1) Mounting Bracket
- One (1) Wall/Electrical Box Mounting Plate
- One (1) Shorting Plate
- One (1) Antenna Module
- One (1) 25 ft. (7.6 m) Coaxial Cable - RG-58 (terminated with BNC connectors on both ends)
- Two (2) Hex Kep Nuts
- Two (2) Fiber Washer
- Four (4) Machine Screw (#8-32x3/4")
- Four (4) Tapping Screw (#8-1/2")
- Four (4) Dry Anchors
- One (1) Owner's manual

2 - INTRUSION SYSTEM SUBMITTALS

1) There is no explanation of how the alarm will be sounded or used as a silent alarm.

Choices available are:

Alarm bell/buzzer on site. / Phone dial up alarm (Cell network or landline) / Internet / Combination of these

-- If Internet monitoring/alarm is used, the 7845iGSM model or equivalent was not specified in the parts list

2) The alarm system is located in electrical closet 137, not the data room.

There is no analog phone jack or ethernet jack specified in this room.

Is there a reason why this room was chosen instead of the data room?

3) There is no phone or internet jack listed in room 137. The library currently uses VOIP for voice calls instead of an analog phone line. If the phone option is chosen, a cell phone service will need to be used. (Again, probably using the 7845iGSM module).

4) The Honeywell 6160 keypad listed is the same keypad we currently use at the high school. After two or so years, the keys have become "mushy" and are hard to press and sometimes requires us to press the key multiple times to get it to "register".

Is there a better keypad we can get with possibly more durable metal keys?

The only other possible keypad that I see that is compatible is Honeywell 6460.

Can we at least get something like this 6460 for the staff area and possible the cheaper 6160 for the front lobby?

5) Motion detectors are shown next to all external doors, which is fine. However, if the lobby is used after hours, the library needs a way to protect for a possible break-in entrance from either the inside entrance doors from the lobby or the multi-purpose room.

I have attached a drawing showing a suggested location for a motion detector to compensate for this and should monitor both doors.

Also as an aside, we will need to program the system to have two (2) security zones/partitions:

- 1) Front lobby and meeting areas
- 2) Rest of the library

3 – PAGING SYSTEM SUBMITTALS

1. The 70v speaker wiring is one zone with one big "daisy chain" connecting all of them. This one-zone solution is not recommended. Separate zones are need for the "library open area", "after-hours meeting rooms", "staff area", and "quiet study areas". **Please split the one-zone system into five zones.** See attached diagram.

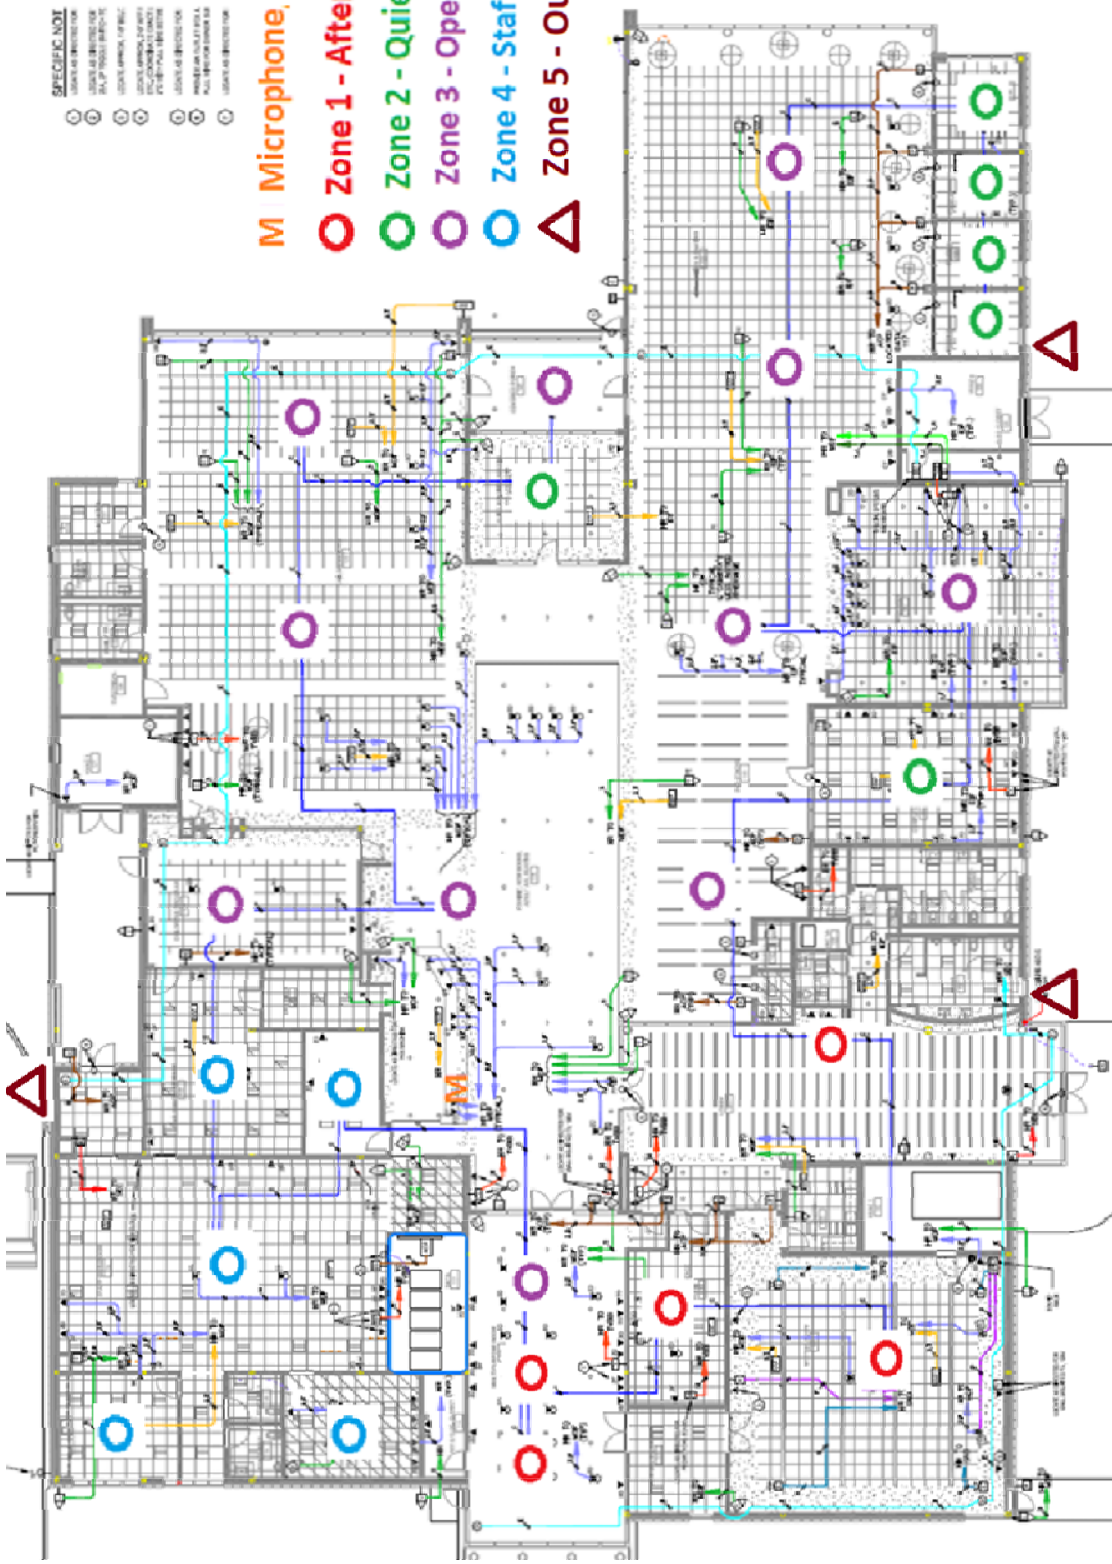

2. The 70v amplifier specified is not feasible for the following reasons:

- a) It needs to support at least 5 zones and currently only supports one.
- b) It needs to support a paging microphone on the circulation desk with zone selection, along with future support for a telephone interface.
- c) The amplifier does not have enough power to run all the speakers. While the documentation does not specify if you plan on using the 3.5 Watt or 5 Watt transformer taps, the louder 5 watt tap is preferable for large open areas.
(30 speakers x 5 watts each + 20% headroom = 180 watts)

Recommended amplifier would be a Quest PR-240BT.

3. There is no microphone listed in the submittals. Without a microphone or a telephone interface, the system would be useless. **Please add a Quest RM-06 microphone to the submittal, matching the amplifier suggested.**

4. Outside paging was overlooked. Please add 3 weatherproof horn speakers to the plan.

Commercial audio solutions for every application

PR-130BT / PR-240BT

Commercial Mixer-Amplifier

All-in-one mixer-amplifiers for use in all types of commercial applications; restaurants, schools, courtrooms, health clubs, retail stores, coffee shops, medical/dental offices, warehouses and more.

Designed for the most common commercial installation requirements

Ideal for background music, mic, and paging with the ability to connect six external sources

Industry standard connectors to make installs fast and efficient

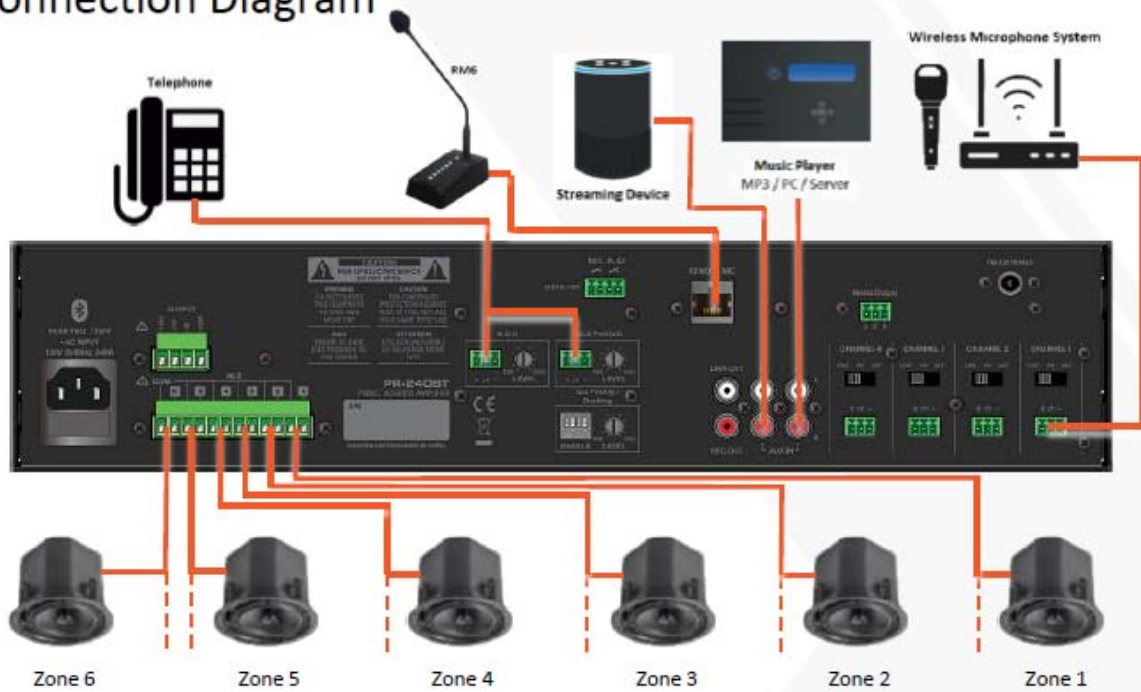

Front panel controls to easily manage source and master volumes with bass & treble control

KEY SPECIFICATIONS

- 70V/100V/4Ω, 130 or 240 Watts
- 2U Rack-mountable (rack ears included)
- CH 1-4 Balanced Mic/Line inputs on Phoenix Terminals with selectable Phantom Power
- 2 AUX Inputs on RCA connectors.
- (1) TELE-PAGING input, and (1) MOH/LINE OUT on 3-prongs Phoenix terminals with level controls.
- 6-zones with individual level control.
- Built-in media player with Bluetooth, USB/SD MP3 player, FM & Recording
- Optional RM6 - 6-zones paging microphone station
- Power, Signal, -20dB, Clip and Protect Indicators
- Output Current Limiting, Thermal Protection & DC Offset protection

Connection Diagram

Specifications

	PR-130BT	PR-240BT
Total Rated Power Output	130W	240W
Speaker Output	4Ω/70V/100V	
Input Connectors	CH1-4 : Mic/Line on balanced 3-Conductor Phoenix Connector with Phantom Power AUX : 2 Line input on stereo RCA	
Speaker Output Connectors	6 Zone outputs for Hi-z (70/100V) only, or single output for 4Ω/70V/100V	
Frequency Response	80Hz - 18kHz (±3dB)	
Tone Control 100Hz - 10KHz	±12dB ±3dB	
S/N Ratio	< 90 dB	
T.H.D (1 kHz)	< 0.5 %	
Crosstalk at all control maximum	-70dB at 1kHz	
Phantom Power	+48 VDC	
Protection	Over current / Over temperature / Under voltage / DC fault	
Power Supply	120V AC, 50-60Hz	
Carton Dimensions	20.7" x 16.5" x 7.6" (525 x 420 x 193mm)	
Weight (Net)	22.05 lbs. (10 kg)	24.25 lbs. (11 kg)
UPC Code	694970007086	694970007109

RM6 6-Zone Gooseneck Paging Microphone

Optional 6-Zones paging microphone with built-in chime for use with PR-130A/BT and PR-240A/BT.

KEY SPECIFICATIONS

- Indicators: Power (Blue), Signal (Green), Clip (Red), Busy (Red)
- XLR microphone input for the included gooseneck microphone
- Individual Zone Selection and ALL zone buttons
- Built-in chime
- Input and output RJ45 jacks for connecting to the PR-Series mixer-amplifier and daisy-linking multiple microphones.
- Up to 4 RM6 microphone station can be interconnected via the link ports

Connection Diagram

Spécifications

Audio Output	0dB (Balanced)
Audio Input	-36 dB ±3 dB (Balanced)
Frequency Response	80Hz~15kHz (-1 dB)
S/N Ratio	Better than 90dB
Total Harmonic Distortion (T.H.D.)	Less than 0.5%
Serial Interface	RS485 Max 200m (UTP CAT5/6)
Operating Temperature	0° ~ +40°C
Weight (Net)	1.10 lbs. (0.5 kg)
Carton Dimensions	7.9(W) x 2.4(H) x 4.7(D) inches
(Width/Height/Depth)	200(W) x 60(H) x 120(D) mm
UPC Code	694970007215

Speco SPC10T 6.5" 70/25V Weatherproof PA Horn Speaker with Transformer

\$39.95

4 – TELECOM SUBMITTALS

- 1) The systems drawings show an IDF in electrical closet 139 to the MDF in Data Room 117 connected via BOTH a 12-strand single mode and 12-strand multi-mode fiber. However, the **submittals DO NOT show the interface modules** needed, **nor the rack** needed to support them (in electrical closet).

The library staff would prefer to have all the wires terminate in the data room for simplicity and in case of power failure in room 139. If the IDF-MDF system is required due to conduit space limitations, please remember that MOST of the coax wires in the electrical closet will need to have PoE+ enabled to power the WiFi and other devices.

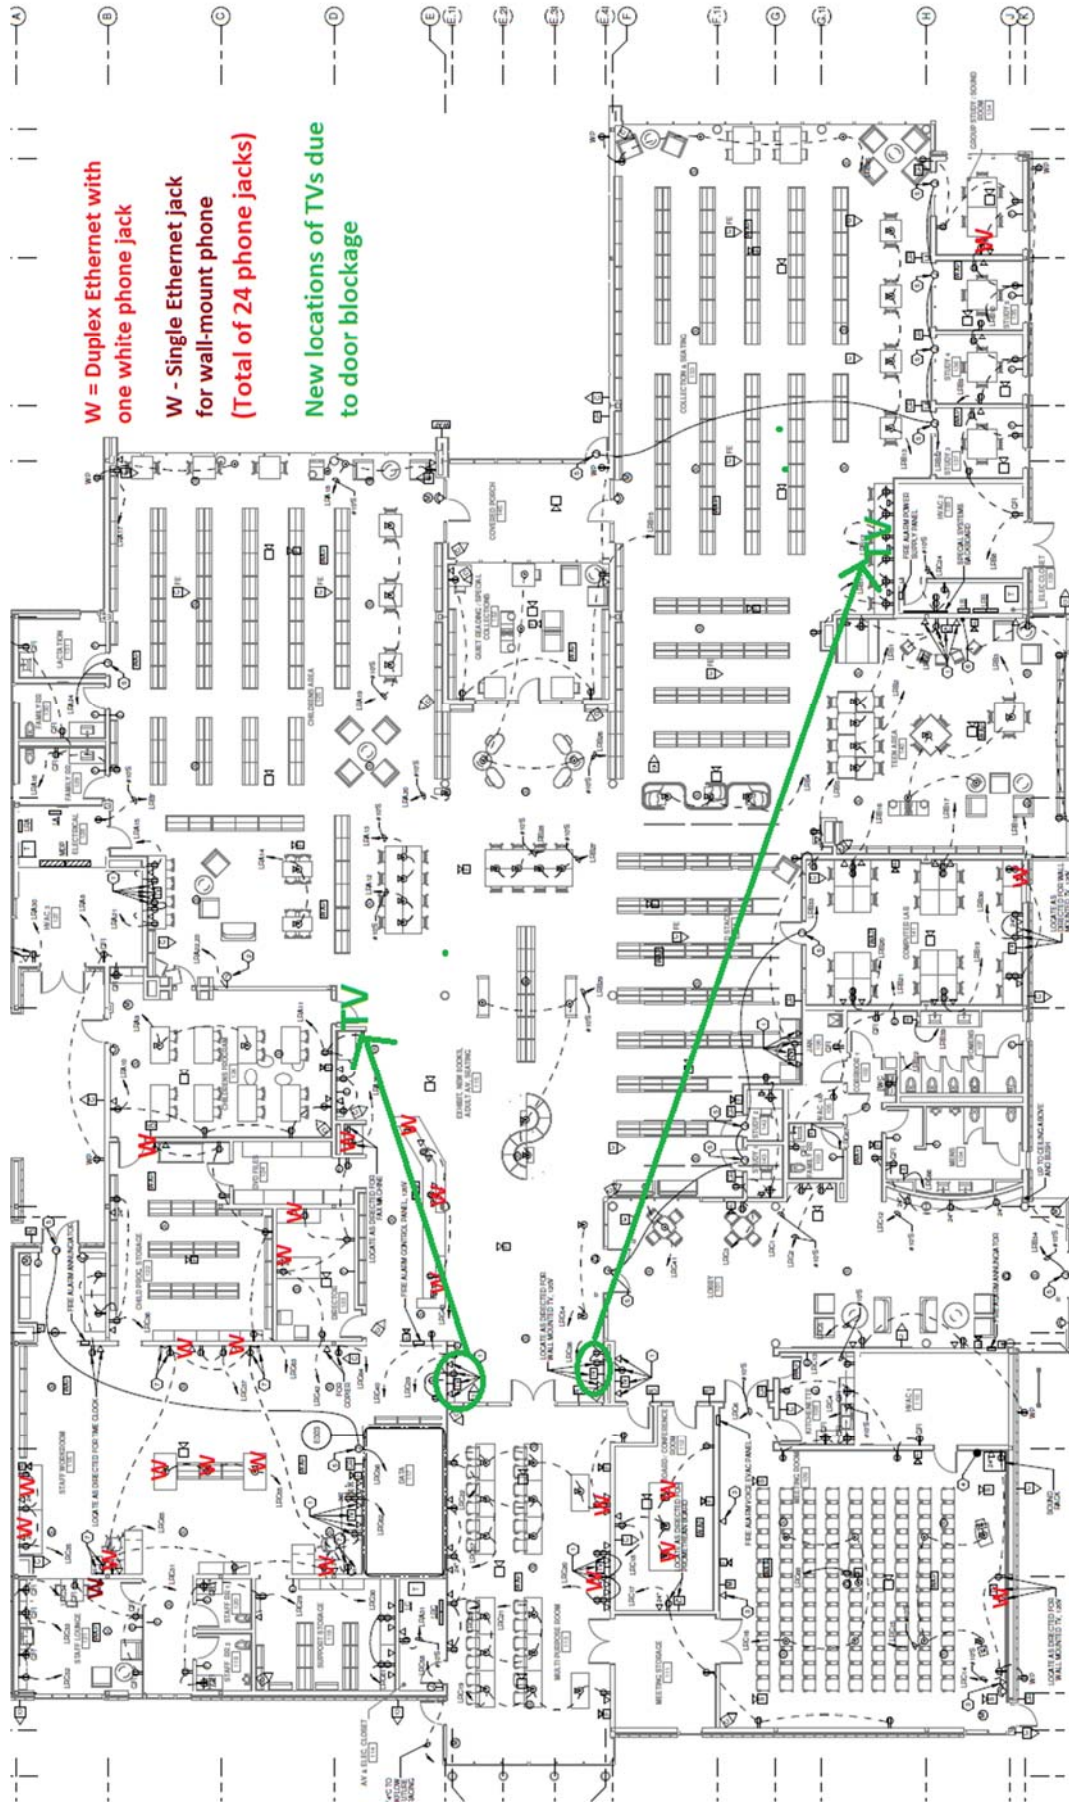

- 2) The CATV system "head end" (TVBB) is located in the electrical closet in room 139 instead of its logical place in the data room.117. There are several reasons that the data room is a better choice:
 - a) There are three RJ6 antenna/satellite cables in the southwest corner of the building terminate in the data room and their signals will need to be mixed and broadcast through the TVBB.
 - b) The data room will most likely be the place where COX cable will run and terminate BOTH their fiber and coax wires into, since it is the central locus for internet access and the coax analog line converter for the FAX.
 - c) TVs used for signage might use a HDMI modulator from a rack-mounted PC in the data room to show the notifications. This PC is in the data room.
PLEASE MOVE THE TVBB into the data room.
- 3) There are two TVs that have changed location in the modified plan. This is due to the new double doors in front of Multi-Purpose room 113, which would block the view of the TVs and possibly cause a collision if opened too far. **Please make sure the new Ethernet, power, and coax wires are at the new TV locations.**
- 4) Ubiquiti WiFi Access Point transmitters are specified inside the building, but the submittal did not mention the external ones. We will need **four (4) U7 Outdoor AP** devices along with metal mounting straps for this installation.
- 5) The specifications call for WHITE Ethernet wires for telephones, however the wiring diagram does NOT show where they are located. To avoid confusion, please see the attached **map of phone jack locations**.
- 6) The plans call for floor power and Ethernet jacks, but the submittal **does NOT show any floor receptacle covers**. To avoid a trip hazard by the public, these should be flat brass plates mounted flush with the floor, NOT tombstone-like devices.

Old location of TV is blocked by THIS door

Old location of TV is blocked by THIS door

1 FLOOR PLAN - ISF-C REVISION
 ASK006 1/4" = 1'-0"

W = Duplex Ethernet with one white phone jack

W - Single Ethernet jack for wall-mount phone
(Total of 24 phone jacks)

TV = New locations of TVs due to door blockage

Installation Guide

*Includes external steel antenna.

Mechanical

Dimensions	170 x 208 x 54.5 mm (6.7 x 8.2 x 2.1")
Weight	1.2 kg (2.6 lb)
Enclosure material	UV-stabilized polycarbonate, aluminum alloy
Mount material	Polycarbonate, 304/316 steel
Pole mount diameter	25-60 mm (1-2.36") on pipe outer diameter
Wind survivability	74.6 N at 200 km/h (16.8 lbf at 125 mph)
Weatherproofing	IP66

Hardware

Networking interface	(1) 1/25 GbE RJ45 port
Management interface	Ethernet
Power method	PoE+
Power supply	UniFi PoE Switch
Supported voltage range	42.5-57V DC
Max. power consumption	19W

Max. TX power	
2.4 GHz	23 dBm
5 GHz	26 dBm
6 GHz	-
MIMO	
2.4 GHz	2 x 2
5 GHz	2 x 2
6 GHz	-
Throughput rate	
2.4 GHz	688 Mbps
5 GHz	4324 Mbps
6 GHz	-
Antenna gain	
2.4 GHz	Directional: internal: 8 dBi / External omni: 3 dBi
5 GHz	Directional: internal: 12.5 dBi / External omni: 4 dBi
6 GHz	-
Antenna beamwidth	
2.4 GHz	90°
5 GHz	45°
6 GHz	-
Antennas	(1) Directional internal antenna (2) External omni antennas (2) RP-SMA connectors for external antenna
LEDs	(1) Power: white/blue (4) Mesh signal: blue
Button	Factory reset
Mounting	Wall, ceiling pole (included)
Ambient operating temperature	-30 to 60° C (-22 to 140° F)
Ambient operating humidity	5 to 95% noncondensing
Certifications	CE, FCC, IC

Software

WiFi standards	802.11a/b/g/n/ac/ax/be
Wireless security	WPA-PSK, WPA-Enterprise (WPA/WPA2/WPA3/PSK)
BSSIDs	8 per radio
VLAN	802.1Q
Advanced QoS	Per-user rate limiting
Guest traffic isolation	Supported
Concurrent clients	200+

Supported Data Rates

802.11a	6, 9, 12, 18, 24, 36, 48, 54 Mbps
802.11b	1, 2, 5.5, 11 Mbps
802.11g	6, 9, 12, 18, 24, 36, 48, 54 Mbps
802.11n	6.5 Mbps to 300 Mbps (MISO - MISO15, HT 20/40)
802.11ac (WiFi 5)	6.5 Mbps to 1.7 Gbps (MISO - MISO9 NSS1/2, VHT 20/40/80/160)
802.11ax (WiFi 6)	7.3 Mbps to 2.4 Gbps (MISO - MISO11 NSS1/2, HE 20/40/80/160)
802.11be (WiFi 7)	7.3 Mbps to 4.3 Gbps (MISO - MISO13 NSS1/2, EHT 20/40/80/160/240)

5 – VIDEO SURVEILLANCE SUBMITTALS

1) Please replace two of the outdoor cameras with **VIVOTEK SD-9384-ELH** or equivalent outdoor PTZ dome cameras.

- One of them should be mounted on the lighting pole in the back staff parking lot, since it is the only security camera for this lot and it will allow us to change directions to focus on the chiller/dumpster area and also the staff entrance if problems occur.

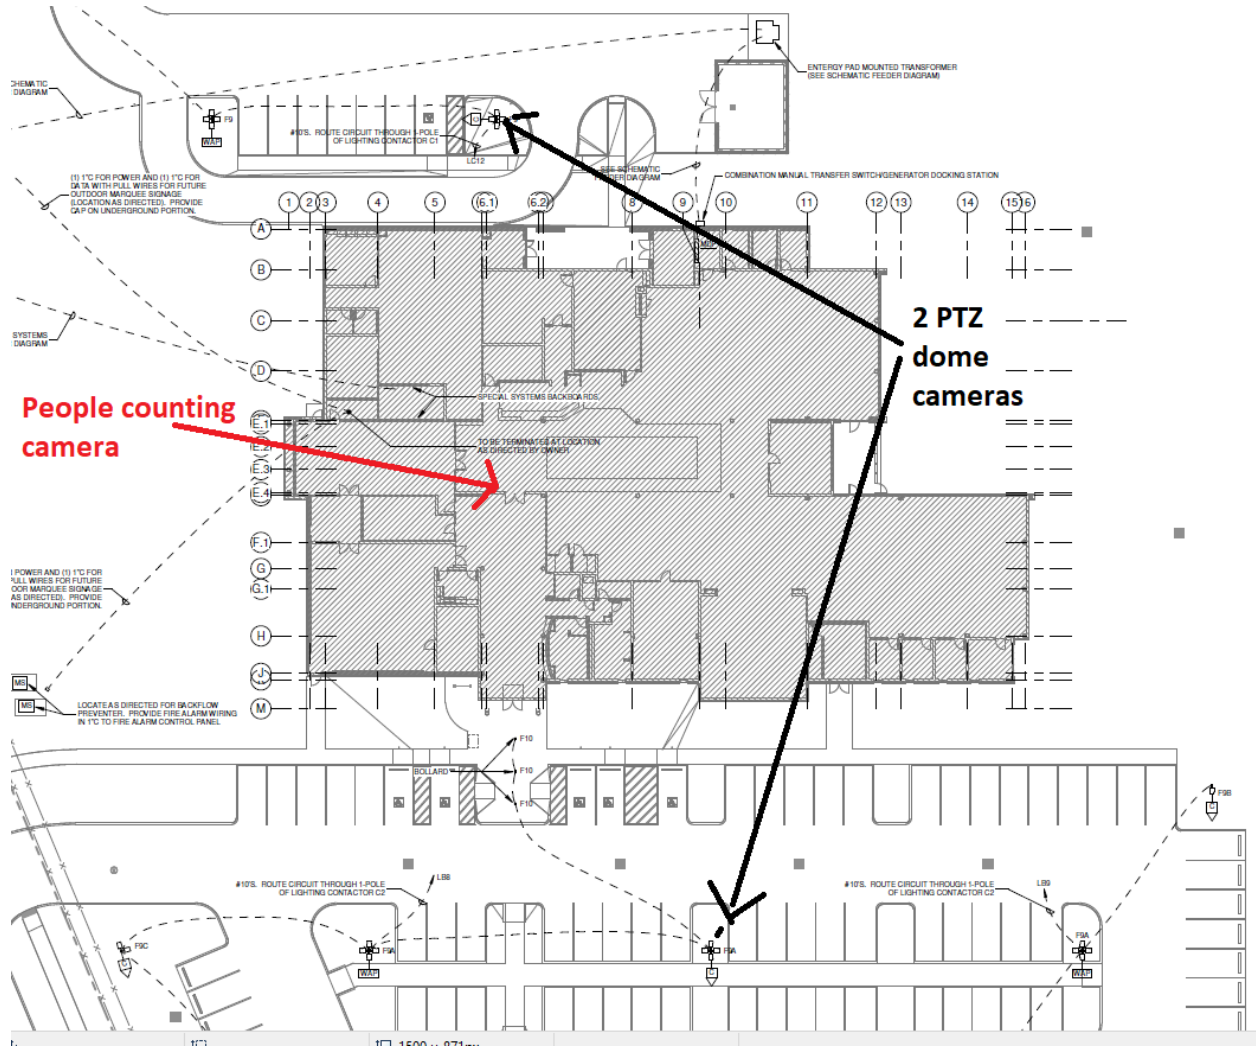

- The second PTZ camera should be located on the lighting pole in the center of the front parking lot and will allow us to view any "dead spots" not picked up by the other cameras.

See attached diagram.

2) Please add a **VIVOTEK SC9133-RTL** people counting camera mounted in the ceiling just inside the library entrance from the foyer, if compatible with the NVR. The plans already have an Ethernet jack mounted in the ceiling in the architect's drawings for this purpose, but it was not marked as a camera. Our current Geovision security camera system has a camera already doing this job, and we do not wish to run 2 camera security systems at the new library.

3) The hard disk drives model is listed on the front sheet as **WD40PURZ**, while the spec sheet indicates the item as **WD43PURZ**. There is no indication of how many drives will be purchased. Two (2) drives would be the bare minimum and would be VERY insufficient for the amount of cameras being used.. I would suggest purchasing and filling all 8 drive bays.

4) The submittal calls for a HP 64V81A6ABA 19" monitor, but the purpose of this is unclear. No video cable is listed in the submittal. If it to be used for install work, there is no mouse or keyboard specified either. If this is to be used as a day-to-day monitoring tool for the library staff at the circulation desk, there needs to be two HDMI to Ethernet conversion adapters included in the submittal.

SC9133-RTL

AI People Counting Camera for Flexible Mounting Height and Scenarios

AI People Counting • High Accuracy • Outstanding Detection Area • Mounting Height 1.9 ~ 10m

Technical Specifications

System Information

Model	SC9133-RTL
CPU	Multimedia SoC (System-on-Chip)
Flash	8 GB
RAM	2 GB

Camera Features

Image Sensor	1/2.8" Progressive CMOS
Lens Type	Fixed Focal
Focal Length	f = 1.47mm
Aperture	F2.7
Field of View	140° (Horizontal) 140° (Vertical) 140° (Diagonal)
Shutter Time	1/60 sec. to 1/32,000 sec.
WDR Technology	WDR Enhanced
Storage	MicroSD/SDHC/SDXC card slot
Built-in Installation Aids	Micro USB*, Pixel Calculator *Requires Micro B converter to connect Wi-Fi dongle

Video

Video Compression	H.265, H.264, MJPEG
Maximum Frame Rate	1792 x 1792 @ 30 fps 896 x 896 @ 30 fps 448 x 448 @ 30 fps
Maximum Streams	3 simultaneous streams
Report Format	JSON/XML/CSV

Audio

Audio Capability	One-way audio
Audio Compression	G.711, G.728
Audio Interface	Built-in microphone

Network

Users	Users Live viewing for up to 10 clients
Protocols	IPv4, IPv6, TCP/IP, HTTP, HTTPS, UPnP, RTSP/RTP/RTCP, IGMP, SMTP, FTP, DHCP, NTP, DNS, DDNS, PPPoE, CoS, QoS, SNMP, 802.1X, UDP, ICMP, ARP, SSL, TLS
Interface	10Base-T/100 BaseTX Ethernet

General

Connectors	RJ45 (through a M12 to RJ45 cable) M12 A-code 12-pin for DC power/ 2x RS485 / 2x DI (max. 60V per port) / 1x DO Memory card slot x1
LED Indicator	System power and status indicator
Power Input	PoE IEEE 802.3af Class 3 DC 9-48V
Power Consumption	PoE: Max. 12.5W DC: Max. 13.3W
Dimensions	140 (D) x 76 (W) x 42 (H) mm
Weight	482 g
Casing	Metal, IP66, IK10
Certifications	CE, LVD, FCC Class B, VCCI, C-Tick, UL, BIS, BSM, UK CE
Operating Temperature	PoE/DC: Starting temperature: -30°C ~ 60°C (-22°F ~ 140°F) Working temperature: -30°C ~ 60°C (-22°F ~ 140°F)
White LED	Yes
IR LED	Yes
Storage Temperature	-40°C ~ 75°C (-40°F ~ 167°F)

Installation

Installation Height	1.9 ~ 10 m
---------------------	------------

Included Accessories

Packing Contents	Quick installation guide, flat mounting bracket with ears, screw pack, M12 to RJ45 cable
Optional Accessories	AM-10G (SC9133-RTL), Recessed Kit for SC9133-RTL AM-11H, Pendant mount kit

VIVOTEK

SD9384-EHL

Speed Dome Network Camera

5MP • H.265 • 30x Optical Zoom • WDR Pro • Smart Stream III • SNV

Technical Specifications

System Information

Model	SD9384-EHL
CPU	Multimedia SoC (System-on-Chip)
Flash	8 GB
RAM	2 GB

Camera Features

Image Sensor	1/2.8" Progressive CMOS
Max. Resolution	2560x1920 (5MP)
Lens Type	30x Optical Zoom, Auto Focus
Focal Length	f = 4.94 ~ 148.24 mm
Aperture	F1.3 ~ F4.6
Iris Type	DC-Iris
Field of View	54.1° ~ 1.9° (Horizontal) 41.2° ~ 1.4° (Vertical) 65.7° ~ 2.4° (Diagonal)
Shutter Time	1 sec. to 1/100,000 sec.
WDR Technology	WDR Pro
Day/Night	Yes
Removable IR-cut Filter	Yes
IR Illuminators	Built-in IR Illuminators up to 200 meters with Smart IR, IR LED*8
Minimum Illumination	0.03 lux @ F1.3 (Color) 0.005 lux @ F1.3 (B/W) 0 lux with IR Illumination on
Pan Speed	Preset speed: 450°/s
Pan Range	360° endless
Tilt Speed	Preset speed: 450°/s

Tilt Range	-20° to 90° (auto flip)
Preset Locations	256 preset locations 128 presets per tour
Pan/Tilt/Zoom Functionalities	32x digital zoom (4x on IE plug-in, 8x built in) Auto Pan mode Auto Patrol mode Mechanical Auto flip
Storage	Seamless Recording to MicroSD/SDHC/SDXC card and recording to network-attached storage (NAS)
Built-in Installation Aids	Remote focus, remote zoom
Video	
Video Compression	H.265, H.264, MJPEG
Maximum Frame Rate	30 fps @ 2560x1920 30 fps @ 2560x1440 60 fps @ 1920x1080
Maximum Streams	3 video streams (Up to 8 configurable profiles)
S/N Ratio	74 dB
Dynamic Range	120 dB
Video Streaming	Adjustable resolution, quality and constant bitrate control, Smart Stream III
Image Settings	General settings: video title and time stamp overlay, video orientation (flip, mirror), day/night settings; Illuminators; anti-overexposure; Image settings: white balance, image adjustment (brightness, contrast, saturation, sharpness, gamma curve), defog, HLM, 3DNR, EIS, scene mode (auto, deblur); Exposure: BLC, HLC, exposure control (exposure level, iris adjustment, exposure time, gain control, iris mode), AE speed adjustment, WDR; Focus; Privacy mask; Scheduled profile settings; Pixel calculator
Audio	
Audio Capability	Two-way audio (Full duplex)
Audio Compression	G.711, G.726
Audio Interface	External line input External line output
Network	
Users	Live viewing for up to 10 clients
Security	Access list, digest authentication, HTTPS, IEEE 802.1x, password protection, Secure boot, Signed firmware, Trend Micro IoT Security (brute force attack event, cyberattack event, quarantine event), User access log, User account management
Protocols	802.1X, ARP, Bonjour, CIFS/SMB, DDNS, DHCP, DNS, FTP/SFTP, HTTP, HTTPS, ICMP, IGMPv3, IPv4, IPv6, NTP, NTP, PPPoE, QoS (CoS/DSCP), RTSP/RTMP/RTCP, SMTP, SNMP, SSL, TCP/IP, TLS 1.2, UDP, UPnP
Interface	Capable of connecting 10 Base-T/100 Base-TX/1000 Base-TX(RJ-45) Ethernet cable *It is highly recommended to use standard CAT5e & CAT6 cables which are compliant with the 3P/ETL standard.
ONVIF	Profile G, S, T supported, specification available at www.onvif.org
AI Analytics	
Compute Capability	SoC with built-in hardware deep learning accelerator
Vision Object Analytics	Object Detection: People, Vehicle (4-wheeled, 2-wheeled); Attribute Extraction: People (gender, clothing color, bag, hat), Vehicle (bike, bus, car, motorcycle, truck, color); Re-Search Extraction; Path Extraction
Application	Deep Learning VCA (Smart Tracking Advanced) Smart Tracking Advanced (Intrusion detection, Loitering detection, Line crossing detection, Face detection, Unattended object detection, Missing object detection)
Application available with license	Parking Violation Detection, Restricted Zone Detection Support for more analytic applications and free trial, please visit vivotek.com/video-analytics
Solution Integration	
Video Motion Detection	Motion Detection (Five-window video motion detection)
VADP Package	Stratocast, Trend Micro IoT Security (3-year free trial)
Alarm and Event	
Event Trigger	Audio detection, camera tampering detection, cybersecurity events (brute force attack event, cyberattack event, quarantine event), digital input, manual trigger, motion detection, periodical trigger, recording notification, SD card life expectancy, smart tracking advanced trigger, system boot, preset reached

Event Action	Event notification via audio clip, camera link, digital output, email, HTTP, FTP, NAS server, SD card File upload via email, HTTP, FTP, NAS server, SD card; trigger track, trigger patrol, move to preset

6 – ACCESS CONTROL SUBMITTALS

The submittal shows the control station electronics but DOES NOT specify a control/scheduling computer, nor does it specify a computer to create and program the access badges. The library does **NOT** want these functions to be off-loaded to the Parish Government.

Having to go to the Parish government complex to get new cards activated or deactivated does not allow timely changes and requires frequent car trips.

Having the control function “in the cloud” to the Parish government computer will cause problems with building and room entry if:

- The Library’s Internet connection goes down.
- The Parish Government’s Internet connection goes down.
- The Parish Government’s control computer is down. This causes problems when the library is open but the government complex is closed, and we can’t get ahold of Parish Government IT staff.

Please add these computers and software to the submittal.

SYSTEM DIAGRAM
